

AOSC 200: Weather and Climate

Instructor: Dr. Tim Canty

Email: tcantv@umd.edu

Office: ATL 3427

Phone: 5-5360

www.atmos.umd.edu/~tcantv/aosc200

Office Hours:

Wednesday 3:00-4:30 PM or by appointment

When emailing, please put AOSC 200 in the subject line and be sure to sign your name at the end of the email

Textbook:

Weather: A Concise Introduction

by: Gregory Hakim and Jérôme Patou

AOSC 200 is an I-series course For more information on this and other I-series classes please visit the [I-Series webpage](#)

Lectures:

Session 1: Tuesday & Thursday 12:30-1:45 pm ATL 2324

Session 2: Tuesday & Thursday 2:00-3:15 pm ATL2324

Discussion Sections:

Section	Day/Time	Location	Teaching Assistant
Session 1: 0101	Wed. 1:00-1:50 pm	ANS 0402	
Session 1: 0102	Wed. 2:00-2:50 pm	ANS 0402	
Session 1: 0103	Wed. 3:00-3:50 pm	ANS 0402	
Session 1: 0104	Wed. 2:00-2:50 pm	CHM 0127	Shaun Howe
Session 2: 0201	Wed. 2:00-2:50 pm	MTH B0429	
Session 2: 0202	Wed. 3:00-3:50 pm	MTH B0429	
Session 2: 0203	Mon. 1:00-1:50 pm	MTH B0429	
Session 2: 0204	Mon. 2:00-2:50 pm	MTH B0427	

Course Description:

Weather affects not just our daily activities but other important aspects of society such as transportation, commerce, security and agriculture. Climate and climate change are concepts that evoke strong emotional responses from people. An environmentalist may say the planet is going to melt tomorrow while a politician makes a snowball in the winter and says everything is fine. Some of those talking the loudest about climate change don't know what climate is and how it's related to weather.

In this class, we will examine fundamental issues such as the greenhouse effect, severe weather, global weather patterns and air pollution and how these factors are affected by a changing climate. Instruction in the lectures will provide the basic knowledge needed to understand these issues. In the discussion sections, students will be divided into groups to address the implications of these conditions on their daily and future lives.

We're here to help you!

If you find yourself struggling with course material, please contact the instructor or a TA right away. **Often, a short conversation will really clear things up!** Waiting until the end of the semester is too late to learn everything we go over in class. Seriously, come talk to us... we get lonely sometimes.

Know your rights!

For more information regarding your rights as a student and the University policies that cover missed classes, please visit the following website:

<http://www.ugst.umd.edu/courserelatedpolicies.html>

Grades:

Overall grades will be determined as follows

Admission Tickets	5%
Topic of the day	10%
Quizzes	20%
Projects	20%
Mid-Term	20%
Final	25%

- If you are ill and cannot make the exams or quizzes, you must have a note from a doctor or from the health center documenting your illness that **must be dated for that day (i.e. you went to be seen that day)**. You must also email me within 24hrs of the exam or quiz. Notes from your parents or a friend will not be accepted. Quiz and exam make ups must be arranged within one (1) week of the date the exam or quiz was given in class. A one day illness does not excuse you from completing the group project.

- **This is the official University Policy covering medically necessitated absences:**

For medically necessitated absences: Students may, one time per course per semester, provide a self-sigfied excuse as documentation of an absence from a single class (e.g., lecture, recitation, or laboratory session) that does not coincide with a major assessment or assignment due date. For all other medically necessitated absences, a course instructor may request that students provide documentation from a physician or the University Health Center to verify an absence. In cases where students are asked to provide verification, the course instructor may request the dates of treatment or the time fidarne that the student was unable to meet academic responsibilities, but may not request diagnostic information. "

- You must attend the exam or quiz that you are scheduled for. You will not be given credit if you take the exam or quiz for the wrong class section.
- Grades cannot be based on perceived effort. What one person feels is a great deal of work may not be much to someone else. Showing up for class doesn't mean you automatically pass the course.

Here's how letter grades will be assigned:

Points	Letter	Grade
95-100	A+	
90-94.9	A	
85-89.9	A-	
81-84.9	B+	

78-80.9	B
75-77.9	B-
71 -74.9	C+
68-70.9	C
65-67.9	c-
61 -64.9	D+
58-60.9	D
55-57.9	D-
below 54.9	F

Extra Credit: There is no extra credit. Requests for extra credit will be ignored.

Grade Curves: Grades will not be curved.

Admission Tickets:

Admission tickets are short, online, multiple choice quizzes that must be completed by **NOON** on the day of lecture. Links to the admission tickets are available on the class calendar. Questions will be based on the reading material for that lecture and will reflect some of the important points that you should take away from the readings. The four lowest scores will be dropped.

Topic of the Day:

Sometimes we will have in class discussions on recent events and/or topics relevant to class. You may be asked to work in small groups or individually in class or in discussion. There will be some before the midterm and the lowest grade will be dropped. There will be some after the mid-term with the lowest grade being dropped. You must be present to receive credit. No excuses. This policy will not be changed simply because you missed all of the topics of the day in the beginning of the semester.

Projects:

Research is an essential part of understanding the Earth system. However, not all research requires an advanced degree and a super computer. In the discussion sections, students will be divided into groups to address the implications of weather and climate issues. There will be two projects and grades will be based on both the quality of the presentation and the participation of each student within the group. Students will have the opportunity to evaluate the other members in the group. Groups are required to submit outlines of their projects to the TAs who will offer comments and suggestions to improve the presentation. Group members will each submit a written outline of their portion of the project as well as a final report when the projects are due.

Project grades will be based on both the quality of the presentation and the participation of each student within the group. Students will have the opportunity to evaluate the other members in the group. Tim and the TA's will be available during the development phase of the project if you need assistance.

Note: All students must participate in development of the project. If there are any problems within the group please contact the instructor or TA immediately to resolve these issues. It is not acceptable to wait until the project is due to mention that you were not able to participate due to communication issues or personality conflicts.

Carillon Community Students Only (Section 0104):

During the semester, there will be three short research projects. For each project, your group will be divided into three teams each with two people: 1) Experiment and analysis, 2) Theory, and 3) Project Management. It will be the responsibility of the project managers to report the results of the project to the Program Managers (Tim and Shaun). Each pair of students will have the opportunity to fill each of the three project roles during the semester.

Quizzes and Exams:

There will be two short quizzes (basically short exams), a mid-term exam, and a final exam. The quizzes will be based on material covered either since the beginning of the semester (Quiz #1) or since the mid-term (Quiz #2). The mid-term exam will be based on material covered in class up to that point in the semester. The final exam will be cumulative but weighted more heavily on material covered later in the semester. I reserve the right to give pop quizzes at any time during the semester.

Any course material not covered in class may be covered on the exams or quizzes.

Attendance:

Attendance is strongly encouraged though not mandatory. If you do miss class because of sickness, family emergency, dinosaur invasion, etc. please review the material for the lecture that was missed. If you have questions please contact the instructor or one of the teaching assistants.

Lecture Recordings:

All lectures will be recorded and available for reviewing. Links to lectures will be posted. Lecture recordings are meant to help with your studying efforts and to allow you to review material that you may not have understood when it was first presented. If overall class attendance drops too low online access to the lecture recordings will be disabled without warning.

Academic Accommodations:

If you have a documented disability, you should contact Accessibility & Disability Services (0106 Shoemaker Hall). Each semester students with documented disabilities should apply to ADS for accommodation request forms which you provide to your professors as proof of your eligibility for accommodations. More information can be found on the ADS website:

<https://www.counseling.umd.edu/ads/>

Religious Observances:

The University System of Maryland policy provides that students should not be penalized because of observances of their religious beliefs, students shall be given an opportunity, whenever feasible, to make up within a reasonable time any academic assignment that is missed due to individual participation in religious observances. It is the responsibility of the student to inform the instructor of any intended absences for religious observances in advance. Notice should be provided as soon as possible but no later than the end of the schedule adjustment period. Prior notification is especially important in connection with final exams, since failure to reschedule a final exam before the conclusion of the final examination period may result in loss of credits during the semester.

Academic Honesty:

The student-administered Honor Code and Honor Pledge prohibits students from cheating on exams, plagiarizing papers, submitting the same paper for credit in two courses without authorization, buying papers, submitting fraudulent documents and forging signatures. On every examination, paper or other academic exercise not specifically exempted by the instructor, students must write by hand and sign the following pledge:

I pledge on my honor that I have not given or received any unauthorized assistance on this examination (or assignment)."

Compliance with the code is administered by the Student Honor Council, which strives to promote a community of trust on the College Park campus. Any instances of academic honesty will be referred to the Honor Council.

In Class Behavior:

It's fine to have short discussions with another student during class if they are 1) quiet and 2) short. If you have a question the two of you can't figure out, please ask and we can try to answer it as a class. Excessive disruption of class is not only rude but

wastes the money of those students who are trying to learn. Any students continuously disrupting class or discussion will be asked to leave.

Cell Phone and Computer usage:

Unfortunately, cell phone use is prohibited unless given express permission for use in class. Using your phone not only keeps you from paying attention but it may distract those around you. We know that it may be difficult to pay attention sometimes so if you need to stand up and stretch or walk around a bit, please do so. If you are waiting for an important call or text message please wait outside.

If you are obviously using a phone during class:

- 1) You will be asked to put it away, if you continue:
- 2) You will be asked to leave
- 3) Class will be stopped until you leave

Any material not covered in lecture due to time spent waiting for students to leave will be covered in the exams.

Computer use is permitted provided if it is for reviewing posted lecture notes or to take notes. There may be in class discussions where computer use is encouraged. If you wish to use a computer while in class, you must sit in the first 6 rows of the middle section of seats. Cell phone rules apply for any computer use not related to class.
